Island County Ordinances and Resolutions Related to Solid Waste	
From Island County Draft Solid Waste Management Plan:	
Ordinance Number	General Ordinance Description
SW-013-93	Adds secured load amendment to county code 13.02A
R-80-86	Established a comprehensive county-wide program for solid waste handling and solid waste recovery under County Code 13.02A(Public Works)
C-125-91	Directive for establishing waste acceptance policy at county facilities.
Oak Harbor 926	Provides franchise to Island Disposal to allow it to collect solid waste for seven years in areas annexed into the city
Langely 776	Establishes a biosolids composting and green waste collection program
Resolution Number	General Resolution Description
HD-01-92	Adopts new regulations (Chapter 8.08A) for proper solid waste handling (Health Department)
Note:	

Solid Waste Infrastructure in Island County

Permitted Solid Waste Handling Facilities in Island County – March 2004

Facility Type	Name	Public/ Private	Owner
Transfer Station	NAS Whidbey Island	Private	
Transfer Station	Camano Transfer Station	Public	Island County Public Works
Transfer Station	Coupeville Transfer Station	Public	Island County Public Works

Notes:

Washington State Utilities and Transportation Commission (WUTC) Permitted Solid Waste Carriers in Island County (November 4, 2002)

Registered Trade Name of Solid Waste Company	Service Area	Certificate# (G permit)	Tariff #	Collect and Transport: MSW	Collect and Transport: Recyclables	Collect and Transport: Yard Waste	Residential Disposal Rates for Weekly Garbage Service by Container (Monthly charge in dollars)	Recycle Service Charge (When Taken With MSW Service)	Commercial Disposal Rates for Company Owned Containers (per Pickup, Non-Compacted Material)	Referenced Service Level Ordinances
Island Disposal, Inc.	All of Whidbey Island	G-154	7	Y	N	N	20 gallon mini-can \$11.43; 32 gallon can/unit \$14.31; Multi can service up to 6.	Not applicable	1 yard dumpster \$15.73; 1.5 yard dumpster \$23.43; 2 yard dumpster: \$30.72.	None Indicated

Notes:

Single Family Residential Service: None

Commercial Service: Rates for this item acquired from Item 240, Page 20 of tariff. Page 21 is also Item 240 and has different rates for the same containers for the same service area. (1yd = \$29.86; 1.5 yd = \$45.11; 2 yd = \$60.10). Rates provided on page 21 represent overweight disposal charges for the indicated unit sizes.

General Notes

- The above solid waste carrier information is portrayed **for WUTC regulated solid waste carriers only**.
- Categories of solid waste customers defined by the WUTC include: single family residential, multi-family residential and commercial. **Multi-family rates are not depicted here.**
- Categories of commercial solid waste collection service as defined by the WUTC include: "Container Service - Non-Compacted - Company-owned container"; "Container Service - Non-Compacted - Customer-owned container"; "Container Service - Compacted - Company-owned container"; "Container Service - Compacted - Customer-owned container"; "Drop Box Service - Non-Compacted - Company-owned drop box"; "Drop Box Service - Non-Compacted - Customer-owned drop box"; "Drop Box Service - Compacted - Company-owned drop box"; "Drop Box Service - Compacted - Customer-owned drop box". **The only Commercial rates provided here are: "Container Service - Non-Compacted - Company-owned container".**
- According to statute, Washington State cities have the authority to contract for solid waste hauling services and associated billing, or to provide their own municipal collection service. Counties have not been granted this option by the legislature. However, statute does direct the WUTC to require regulated solid waste collection companies to comply with the service levels set in the local solid waste management plan. The WUTC defines the service area and monetary collection rates for private firms that service all county residents, as well as for private firms that service those municipalities which do not provide garbage collection service or contract for such service.
- **Of the 280 cities in Washington, 187 take advantage of their option to contract for service or provide their own service. Consequently, the WUTC regulates the solid waste haulers that service approximately 49% of the state's population.** (This includes 40% of the state's population that resides in unincorporated areas, and 9% of the state's population that resides in incorporated areas.)
- Currently, there appears to be no complete tabulation of solid waste collection rates charged to residents of Washington State municipalities is available, and thus there is incomplete knowledge of the direct economic impacts of solid waste disposal on approximately 51% of the state's population.
- [A Certificate \(or "G-permit\) means the certificate of public convenience and necessity issued by the Washington Utilities and Transportation Commission](#) under the provisions of chapter 81.77 RCW for the operation of solid waste collection companies.
- A tariff names rates for the collection, transportation, and disposal of solid waste, and if noted, recycling and yard waste (a document outlining rates, terms and conditions for providing service.) While the G-permit provides an overall legal description of the geographical area in which a carrier is allowed to operate, a tariff defines rates for services and service areas within the geographical area defined in the G-permit. Further, tariffs define the rates a permitted solid waste carrier charges to its residential, multifamily and commercial customers

Island Co Public Works	56,325	5,900	—	62,225				
Litter Crew Organization, Island County, 2002								
Contracts with Lighthouse Environmental Programs and/or Waste Warriors and Beachwatcher programs to organize and implement a volunteer beach and park litter cleanup program for Island County. Material picked up is gathered at designated locations and picked up by state and/or county parks representatives. Island County Public Works plan to assist landowners with litter collected along beaches (through transporting filled litter bags from designated points to solid waste facility). Program uses only volunteer labor for litter cleanup.

Notes for Biosolids table on previous page

- 1) Data used here are gathered from individual facilities and consolidated into a main database from which this spreadsheet is derived. Referral to the actual report forms is suggested in order to resolve questions or before drawing conclusions.
- 2) Facilities which show zero production are for year 2002 only. Production amounts can vary by large amounts from year to year depending on lagoon cleanout operations, etc.
- 3) For the categories related to TRANSPORT TO and RECEIVED FROM, tonnage sums are totaled and reported in parentheses if the sums are different from that reported by the facility. Reasons for discrepancies are varied and need to be investigated on an individual basis if needed.
- 4) The term "ctd." means that the data for the facility is continued in another column where extra lines were used so that additional data could be included.
- 5) WWTP = Waste Water Treatment Plant; STP = Sewage Treatment Plant; BS = Biosolids; LSP = Lime Stabilization Plant; POTW = Publicly Owned Treatment Works.

Island County Solid Waste Priorities and Needs for the Near Future:

■ **PUBLIC WORKS:**

- 1) hydrogeology/regulations,
- 2) biosolids
- 3) MRW/ Recycling

■ **JURISDICTIONAL HEALTH DEPARTMENT:**

- 1) ensure long-term consistent funding for Island Co SW
- 2) compliance & enforcement
- 3) composting facility start-ups

Island County's Projected Solid Waste Income and Spending, 1999 (as compiled by Jeff Kelly-Clarke, Director, Snohomish County Public Works)

Spending

Total Spending	Waste Handling*	LF Monitoring	Waste Reduction and Recycling	Moderate Risk Waste	Planning	Administration	Debt Service	Other	Capital Facilities/ Closure	To Fund Balance	Operating Budget
\$4,442,000	\$2,767,000	\$157,000	\$353,000	\$216,000	\$16,000	\$564,000	\$0	\$142,000	\$227,000	\$0	\$4,215,000
